Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 October 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Amendment Entry

1. Applicant's amendment and response filed on October 9, 2007, is acknowledged and has been entered. Claims 1, 4-12, 14, and 18-25 have been cancelled. Claims 33-41 have been added. Accordingly, claims 33-41 are pending and subject to further restriction requirement as follows.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 33-37, drawn to flow analyzer apparatus having a single reaction vessel and reagent supply portion, classified in class 435, subclass 287.3, for example.
- II. Claims 38-41, drawn to flow analyzer apparatus having different reaction vessels, different reagent supply portions, and counting sample supplier, classified in class 422, subclass 63, for example.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1641

Inventions I and II are independent and distinct. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, and different effects in that Invention I has a single reaction vessel and reagent supply portion for detecting and analyzing a whole blood sample and Invention II has multiple reaction vessels and reagent supply portions that allow differential detection and analysis of differentially treated whole blood samples.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Furthermore, because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. Literature search for each apparatus is distinct since the structural requirements of each invention are different. While searches would be expected to overlap, there is no reason to expect the searches to be coextensive.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gailene R. Gabel whose telephone number is (571)
